The **Send Natural Meadow Burial Ground** is part of the well cared for rural Cemetery in the Village of Send.

The Natural Meadow Burial Ground is a designated quiet area in the newer part of the cemetery and is bordered on two sides by native trees. The area is intended to be as natural as possible.

The area is filled with native grasses and flowers.

This beautiful meadow makes it a tranquil and peaceful resting place.

The Natural Burial area is for people of all faiths or no faith.

Burials, ashes interment and scattering of ashes are all welcomed. It is a condition of being buried in the Natural Meadow Burial area that coffins and caskets for ashes are made from biodegradable material

such as willow, pine or recycled cardboard, though a simple shroud made of natural fabric (e.g. wool, cotton or linen) can also be used.

Memorials made of slate or wood (maximum A4-size) may be laid flush to the ground. Memorial benches may be placed in the Natural Burial Ground; however, they must comply with the Send Parish Council's Cemetery Regulations.

The planting of native plants (including seeds and bulbs) is welcome on the grave area.

These should be chosen from a list of suitable plants, which is provided by the Clerk of Send Parish Council.

Electronic and paper-based plot marking and recording systems, ensure that graves are accurately recorded and easily located.

Information and regulations are provided by the Clerk of Send Parish Council:
